

CH-3 Metal & Alloys

Join WhatsApp group -9234415244
Abhishek Gp Dumka

Q-1 → Define:

(i) Gangue (ii) Flux (iii) Lustre (iv) Slag (v) Metallurgy

Q-2 → Write about mechanical properties of metals

Q-3 → What is an alloy? what is the purpose of making alloys?

Dipolma campous

4. Physical properties and application of —

(i) Iron (ii) Copper (iii) Aluminium, tungsten, zinc, lead, tin etc.

5. Write composition and uses of —

(i) Brass (ii) Gun metal (iii) German silver (iv) Bronze

(v) Duct metal (vi) Duralumin (vii) Alnico, wood and non metal.

① write the different types of alloys, describe the purpose making alloys.

② Explain the physical properties & application of Cu, Al, Fe, Cu Ni, Sn, Pb, Zn, Ca, Ag.

③ write the stages of extraction of metals from its ores.

④ Explain refining and crushing concentration.

⑤ difference b/w non ferrous and ferrous with suitable examples.

⑥ Explain ~~con~~
write the composite properties & application of Alnico, duralumin, Dutch metal, ~~etc~~

⑦ Short notes

⑧ ~~gun metal~~ gun metal

⑨ monel metal

⑩ wood metal and metal Babbitt metal
