

IMPORTANT QUESTION

Unit:- 1 statistical data collection and types

QNO :-1 what is data ? explain types of data ?

QNO:- 2 difference between qualitative and quantitative data ?

QNO:- 3 define nominal data and ordinary data ?

QNO:- 4 explain discrete and continuous data ?

QNO:- 5 define and give the example of qualitative data quantitative data discrete data continuous

QNO:- 4 explain discrete and continuous data.

QNO:- 5 define and give the example of qualitative data quantitative data discrete data continuous data .how do they differ ?

QNO:- 6 .explain the collection data and types of data collection tool ?

a:- questionnaires

b:- survey

c:- interviews

d:-focus group discussion

UNIT:-2

SUMMARIZATION DATA

Ajanta

Page No. _____

Date _____

- ① what do you mean by descriptive statistics ?
- ② Define Central Tendency ?
- ③ Define frequency table write the steps and Advantages of frequency tables ?
- ④ Explain Relative frequency table ?
- ⑤ what do you mean by grouped data ?
- ⑥ what do you mean by Histogram and write its usage ?
- ⑦ Explain data distribution ?
- ⑧ write the short notes :—
 - (a) Bar graph
 - (b) pie chart
 - (c) line graph
 - (d) frequency curve
 - (e) frequency polygon
 - (f) Relative frequency polygon
 - (g) Box plot

UNIT:-3 MEASURE OF LOCATION AND DISPERSION

IMPORTANT QUESTION

- ① The heights (in cm) of 7 plants are recorded as 25, 30, 28, 25, 32, 30, 28. determine the range, mean, median, and mode of the plant heights using excel?
- ② Explain How to determination of central tendencies Range, Mean, mode and median for the data in Microsoft excel?
- ③ Explain the measure of central tendency :- mean, median and mode?
- ④ Explain How to determination of Absolute Measures of dispersion for data like Range, Quartile Deviation, Mean Deviation, Standard Deviation and variance in Microsoft excel?
- ⑤ Explain the concept of Skewness and kurtosis in data set?
- ⑥ If you have following data set -
5, 7, 12, 15, 18
The mean could be calculated as
find mean = ?
- ⑦ find the median =
3, 1, 4, 1, 5, 9

⑧ finding median of grouped data
To find the median of grouped data ? follows .

Class Intervals	frequency	cumulative contina data
0-10	5	5
10-20	8	13
20-30	12	25
30-40	20	45
40-50	10	55

Using formula

$$L + \left(\frac{\frac{N}{2} - cf}{f} \right) \times h$$

⑨① find the mode $\bar{F}$
2, 3, 4, 4, 4, 5, 6, 6, 7

⑥ finding mode of grouped data
to find the mod of grouped data

Class intervals	frequency
0-10	5
10-20	8
20-30	12
30-40	20
40-50	20

⑩ Explain Quartile ? How to calculate Quartiles ? and write its formula ?

⑪ Suppose you have following data set
6, 47, 49, 15, 46, 53, 48, 50, 51.

- ① Calculate (Q_1) the first Quartile
- ② Calculate (Q_2) the Second Quartile
- ③ Calculate (Q_3) the third Quartile

⑫ Define mean Deviation?

⑬ ① Calculate the mean

3, 5, 7, 9, 11 and

② Calculate the Standard mean deviation?
3, 5, 7, 9, 11

⑭ Explain Quartile Deviation? write the formula?

⑮ find the Quartile Deviation
consider the following data set
6, 15, 46, 47, 48, 49, 50, 51, 52

⑯ Explain Standard Deviation? and write its formula?

⑰ find the standard deviation
lets calculate the standard deviation for following data set
(2, 4, 4, 4, 5, 5, 7, 9)

⑱ Calculate the skewness?
2, 3, 5, 7, 8, 10

⑲ Calculate the kurtosis?
2, 3, 5, 7, 8, 10

P.Y.Q ① Describe necessity of protective devices?

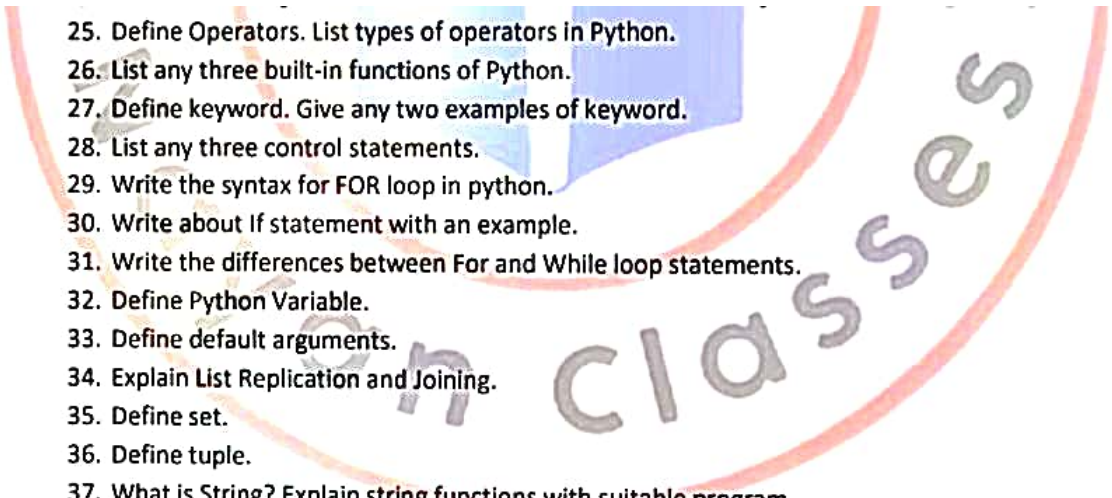

P.Y.Q ② Describe any four protective devices with their suitable diagrams?

③ Define earthing and why it is provided?

④ Explain Variance and write its formula?

⑤ Calculate the variance
2, 4, 4, 4, 5, 5

- (b) Define Array. What is the purpose of the array module in Python? How do you create an array of float numbers using the array module in Python? 7+7
6. (a) How do you define a function in Python? Write a program in python to print the Cube of a number using function.
- (b) Define operator in Python. Discuss different types of operators in detail with example. 7+7
7. Write short notes on *any four* of the following:
- (a) If-else statement
 - (b) While loop
 - (c) Standard deviation
 - (d) Variance
 - (e) Line Graph

- 
25. Define Operators. List types of operators in Python.
 26. List any three built-in functions of Python.
 27. Define keyword. Give any two examples of keyword.
 28. List any three control statements.
 29. Write the syntax for FOR loop in python.
 30. Write about If statement with an example.
 31. Write the differences between For and While loop statements.
 32. Define Python Variable.
 33. Define default arguments.
 34. Explain List Replication and Joining.
 35. Define set.
 36. Define tuple.
 37. What is String? Explain string functions with suitable program.
 38. Explain string slicing and string Immutability with a sample program.
 39. Explain any four list methods with a sample python program
 40. Explain arithmetic and logical operations.
 41. Explain input and output statements.
 42. Explain conditional statements in python.
 43. Explain looping statements in python.

Note: This is first exam after syllabus change, so don't rely 100% of this questions.
