

Electrochemistry – Important Questions

Abhishek Gp Dumka

Prepared Notes / Study Questions

Join WhatsApp group:- 9234415244

Q1	Describe the electrochemical series for cations and anions.
Q2	What do you understand by corrosion? Discuss different types of corrosion with their mechanism.
Q3	Define Arrhenius theory of ionisation.
Q4	What is degree of ionization? Discuss the factors affecting the degree of ionization.
Q5	Define electrolytes.
Q6	What is electrolysis? Write down different uses of electrolysis in detail.
Q7	What do you mean by electrochemistry? What is the difference between galvanic cell and electrolytic cell?
Q8	Explain the mechanism of electrolysis of aqueous NaCl solution and fused NaCl using carbon electrode.
Q9	Explain Faraday's laws of electrolysis.
Q10	Explain the concept of reduction potential and oxidation potential.
Q11	Explain electroplating.
Q12	0.1948 g of copper is deposited by a current of 0.2 ampere in 50 minutes. Find the electrochemical equivalent of copper.
Q13	Explain the difference between primary cell and secondary cell with examples.

Write Short Notes:

a) Electroplating

Abhishek kumar gp dumka

b) Electro-refining

c) Electrometallurgy

d) Electrotyping
