

- **Difference between conduction convection and radiation?**

- briefly explain the modes of heat transfer.

The background of the slide is a solid teal color. It features several abstract, semi-transparent geometric shapes. A large circle with a smaller circle inside it is positioned in the upper right quadrant. To the right of this, there are several smaller circles of varying sizes. In the bottom right corner, there is a cluster of vertical, rounded rectangular shapes that resemble a bar chart or a set of columns.

**What are centigrade scale
fahrenheit scale and kelwn
scale.**

Define bad conductor and good conductor with example .

Explain law of thermal conductivity, coefficient of thermal conductivity and its SI unit's.

Difference between linear and
aerial or cubical expansion .

Relations between linear aerial and cubical expansion (no derivation)
