

SURFACE TENSION

Dipolma classes

FRIENDS
OF TESSAL PROPERTY

Page No.

- ① What is Surface tension and its SI units, Effects of Impurities and temperature on Surface tension.
- ② difference between cohesive and adhesive forces.
- ③ Laplace's' molecular theory.
- ④ define capillary action with Examples

VISCOSITY

- ① Newton's' law of viscosity
- ② coefficient of viscosity and its SI units.
- ③ Define
- ④ viscosity
- ⑤ Types of flow
- ⑥ Reynold's' Number
- ⑦ Stokes' Law
- ⑧ Surface Tension

Dipolma classes

- ④ define velocity gradient and write the coefficient of viscosity and its SI unit.
- ⑤ define capillary action with examples

Dipolma classes

CH:-2 ELASTICITY

- ① Explain young's modulus of elasticity and modulus of rigidity
- ② write short Notes
 - ④ Restoring force
 - ⑥ deforming force
 - ⑦ Hook's Law
- ③ Explain stress and strain or its types
- ④ and relation between them (no deviation)
 - ⑤ Stress and strain diagram
 - ⑥ behavior of wire under continuously increasing load
 - ⑦ Yield point
 - ⑧ ultimate stress
 - ⑨ breaking stress
 - ⑩ Factor of safety
