

Modern Physics

5.1 Photo electricity

- ① concept of photon and properties of photon
- ② Explain plank's hypothesis
- ③ define photo electric effect and characteristics of photoelectric effect. or work function.
- ④ define photoelectric cell - construction - working and applications.

5.2 X-Rays

- ① define X-Rays, types of X-Rays - continuous and characteristics.
- ② production of X-rays using Coolidge tube.
- ③ define minimum wavelength of X-rays, and properties of X-rays.
- ④ medical and scientific applications.

* P.Y.Q 2024

- ① Explain construction and working of photoelectric cell.
- ② Calculate the energy of photon of red light in a vacuum with a wavelength of 695nm.
- ③ Short notes
 - ① properties of laser
 - ② X-rays
